Test Instructions

What to Expect:

1. 15 quick trials (about 3-5 minutes)
2. Color words will appear on screen
3. Press:
 - RIGHT ARROW if word meaning MATCHES the color
 - LEFT ARROW if word meaning does NOT match the color

Before Starting:

- Use a computer (not mobile phone)
 - Ensure good internet connection
 - Find a quiet space
 - Keep fingers on LEFT/RIGHT arrow keys
-

How to Analyze Your Results

Step 1: Download Your Data

After completing the test:

1. Click "Download CSV" button
2. Save file to your computer
3. Remember where you saved it

Step 2: Analyze in Google Colab

1. Open: <https://clck.ru/3Pu4b2>

2. Click: "Runtime" → "Run all" (or Ctrl+F9)
3. Upload: Your downloaded CSV file when prompted
4. View: Your personalized results and graphs

Step 3: Save Your Results

- Take screenshots of the graphs
 - Download the statistics table
 - Share with researcher if required
-

Understanding Your Results

What You'll See:

- Reaction Time Comparison: Congruent vs Incongruent trials
- Accuracy Rates: Percentage of correct answers
- Statistical Summary: Mean times and standard deviations

Key Metrics:

- Congruent Trials: Word matches color (easier)
- Incongruent Trials: Word differs from color (harder)
- Stroop Effect: Difference between these conditions
